Lawn Grass Seed

LOUISVILLE LAWN MIXTURE

This blend of fine-leaved grasses with White Dutch Clover is recommended for use in reseeding established lawns, patching thin spots, and for seeding newly graded yards where a permanent stand of Kentucky Blue Grass is desired. Ready for cutting after 30 days of good weather. This seed should be broadcast evenly to avoid a patchy appearance.

For New Lawns. The soil should be well prepared, and Bone Meal or Sheep Manure should be well incorporated with the soil. Seed should be sown at the rate of 1 pound for every 300 square feet, selecting a time when there is no wind. After sowing, roll or rake lightly.

For Old Lawns. Bare spots should be vigorously roughed with a steel rake. An application of SHEEP MANURE will act as a stimulant to patches lacking plant food. Scatter the seed as evenly as possible, then rake or roll lightly.

Several sowings are better than one. Do not risk all your seed at one time. The seed may be washed away by a downpour of rain immediately after planting. A good plan is to sow a part of your seed walking East and West—the next time walk North and South, in this way assuring an even distribution. Very good success can be had from scattering seed on a soft snow. In spring it is well to rake out all dead grass before sowing.

Use Grass Seed Generously. Where lawns are kept in neat condition, the plants do not produce seed as Nature intended. This deficiency must be supplied by an occasional seeding.

Prices: 1 lb., 40c; 3 lbs., \$1.10; 5 lbs., \$1.75; 10 lbs., \$3.25.

SHADE GRASS MIXTURE

For use in courts, under trees and shady places, we have produced a mixture with shade-loving grasses which will give excellent results where other grasses fail. When the grass has become established, water generously once a week, and give an application of Sheep Manure and Bone-Meal at least twice a year.

Prices: 1 lb., 50c; 3 lbs., \$1.40; 5 lbs., \$2.25.

TERRACE MIXTURE

A strong network of roots is necessary to prevent washing on steep terraces and banks. In this mixture we have blended the proper seeds to make a fine sod of velvety texture, grasses which will start quickly and give permanent effect.

Prices: 1 lb., 60c; 5 lbs., \$2.75.

KENTUCKY BLUE GRASS

This seed should be used only on well-established lawns, as it does not "stool out" or produce a turf until the second year. On newly graded soil, Blue Grass should have a nurse crop of Red Top and White Dutch Clover.

Prices: 1 lb., 35c; 5 lbs., \$1.60; 10 lbs., \$3.00.

Annual Flower Seeds

The seeds of some annuals may be sown as early as February in the open garden; others must wait until the earth has become warm and friable. All of them will bloom the first year and complete their cycle. Noteworthy among those whose seed may be scattered in early spring are Annual Poppies, Cornflower, Petunia, Larkspur, Nicotiana, Nigella, Snapdragon and Cosmos.

As soon as the ground can be prepared, plant Sweet Peas.

Some of the tender, late-blooming annuals can be brought into flower earlier by sowing the seed under glass or in boxes indoors. In this group are found: Asters, Scarlet Sage and Verbena.

Try a few new things this year.

ROSES

The rose is unsurpassed as a garden flower, due to its enchanting colors, delightful fragrance, and continuous blooming season. Little wonder the rose is our most popular cut flower. By constant selection and hybridizing, the quality of our modern roses is vastly superior to those of the past generation.

The beginner with roses will find soon enough that his plants will not thrive with neglect. To succeed with roses, one must water and feed judiciously. Cultivate thoroughly and be ever on guard against its worst enemies—insects and disease. Black

spot and mildew may be controlled by dusting or spraying at regular intervals throughout the season. Most of the fungicides in use today may be combined with a compatible insecticide, thus making an "all-around spray." There are available a number of ready-mixed dusts and sprays for those who do not wish to be troubled with mixing their own. Having adopted an adequate program, the gardener can assure himself of gratifying results if his plan is followed religiously. We do not mean to discourage those who contemplate growing roses, but we do wish to emphasize the importance of constant care.

Ami Quinard. H. T. This is the most popular dark red rose, the buds opening into a semi-double fragrant flower of velvety crimson-maroon. 75c each.

Autumn. H. T. Burnt-orange and red. Notable for its strikingly rich fall bloom. 75c each.

Betty Uprichard. H. T. Delicate salmon-pink flowers with a suggestion of carmine. Fragrant. Its popularity as a pink rose is well deserved. 75c each.

Caledonia. H. T. Full double flowers of pure white borne on strong canes. If you are looking for a good white rose, try Caledonia. 75c each.

Charles K. Douglas. An unusually striking flower of crimson-scarlet; vigorous growth and healthy foliage. 75c each.

Condesa de Sastago. H. T. Reddish copper inside with rich gold reverse. The striking flowers are borne on vigorous branching plants. An unusual rose which is sure to make many friends. 75c each.

Countess Vandal. Plant patent No. 38. An exquisite two-tone pink with coppery-gold. Fragrant, healthy. \$1.00 each.

Dame Edith Helen. H. T. Large, double, pink flowers of perfect form held on strong stems. A winner at many exhibitions. Sweet-scented. 75c each.

Duchess of Atholl. Coppery orange-yellow buds opening with a golden suffusion of old rose. Free blooming, thrifty plants. 75c each.

Edith Nellie Perkins. H. T. A beautiful two-toned salmon-pink. The shapely, long-pointed buds are produced in abundance. The mildly fragrant flowers are excellent for cutting. 75c each.

Editor McFarland. H. T. Brilliant, clear pink flowers with strong stems. Last well when cut. 75c each.

Etoile de Hollande. H. T. We consider this the best red rose in the world. The flowers are fragrant, large and beautiful. The canes are strong and the foliage healthy. 75c each.

Federico Casas. H. T. Coppery pink and orange. Splendid as a garden subject as well as for cutting. 75c each.

Grenoble. H. T. One of the best reds, the scarlet crimson flowers freely borne on long stems, make this one of the best varieties for cutting. 75c each.

Joanna Hill. H. T. Creamy yellow buds flushed with orange at the base. Borne on strong canes. 75c each.

Heinrich Wendland. H. T. Distinctly two-tone nasturtium red, reverse golden-yellow. The large double blooms have unusual fragrance. 75c each.

Kaiserin Auguste Viktoria. H. T. A fragrant pure white. 75c each.

Lady Alice Stanley. H. T. Introduced 30 years ago, this rose is still dependable for cut flowers as well as for bedding. The color, coral rose and pale flesh pink. Sweet-scented. 75c each.

Margaret McGredy. H. T. Orange-scarlet buds opening to carmine-rose. The pleasing fragrance and continuous bloom make this a choice variety for garden display. 75c each.

Mrs. G. A. Van Rossem. H. T. Buds of vivid apricot and golden yellow, opening to a gorgeous golden salmon and light orange. Disease-resistant, leathery foliage. 75c each.

Mme. Joseph Perraud. H. T. Long, slender buds of nasturtium-orange opening to pink buff. Rare fragrance. An excellent flower for cutting or exhibition. 75c each.

Mrs. E. P. Thom. H. T. Medium-sized clear canary-yellow. Free blooming. 75c each.

Mrs. Pierre S. DuPont. H. T. Long, pointed buds of fadeless yellow, borne on healthy foliage. This is our favorite among the yellow roses. 75c each.

Mrs. Sam McGredy. H. T. Long scarlet-orange buds opening to full-cupped flowers of orange-rose. A splendid rose, excellent for cutting. 75c each.

President Herbert Hoover. H. T. Flame, scarlet and yellow. As a garden rose, it is far superior to Talisman. 75c each.

President Plumecocq. H. T. Coppery-buff with a warm salmon glow. The upright growth bears a profusion of fragrant blooms throughout the season. 75c each.

Radiance. H. T. Well-known globular flowers of rose-pink. 50c each.

Red Radiance. H. T. Rose-red flower borne on strong stem. 50c each.

Sister Therese. H. T. Golden daffodil yellow flowers on sturdy long canes. 75c each.

Talisman. H. T. Scarlet-orange and rich yellow. 75c each.

CLIMBING ROSES

Climbing American Beauty. The strong, disease-resistant growth bears a wealth of flowers identical with its parent, the American Beauty. 75c each.

Emily Gray. H. W. Large semi-double golden buff, borne on strong growing canes with glossy foliage. Needs winter protection. Should be grown against a pillar or on a trellis. 75c each.

Mme. Gregoire Staechelin (Spanish Beauty.) The pointed pearl-pink buds are held on stems of such length as to make them excellent for cutting. The flowers are borne in such profusion as to make this a most desirable climbing rose. 75c each.

Mary Wallace. Large well-formed flowers of vivid pink with golden salmon base. This hardy climber was originated by Dr. Van Fleet. 75c each.

New Dawn. An ever-blooming sport of Dr. Van Fleet, and the flowers are identical. Dainty pink flower. Blooms from early summer till frost. Plant Patent No. 1. \$1.50 each.

Paul's Scarlet Climber. H. W. Intense scarlet flowers. Very popular. 75c each.

Silver Moon. The large, silvery white flowers are made doubly attractive by the bright yellow stamens which fill the center. 75c each.

For Growing Healthier Plants

Amazing New Vitamin Discovery

Daffodils as large as a salad plate, five-inch rose buds, rose bushes in full bloom transplanted in mid-summer without wilting. These are some of the astounding claims made for Vitamin B-1. This substance is so new that its limitations are not known nor have all its uses been discovered. The use of Vitamin B-1 promises more luxuriant foliage, larger flowers and sturdier, healthier plants.

Each kit contains a bottle of Vitamin B-1 crystalline powder; a special dropper, a basic solution vial, a measuring pick and complete directions for using. Complete kit, \$1.00.

ROOTONE

For better rooting of grass seed, flower seed, cuttings, bulbs and vegetable seed.

Rootone is a powder containing powerful synthetic plant hormones. Cuttings dipped in this powder root easily and quickly. Complete directions with each package. Trial size (400 cuttings), 25c; 2-oz. jar (3,000 cuttings), \$1.00.

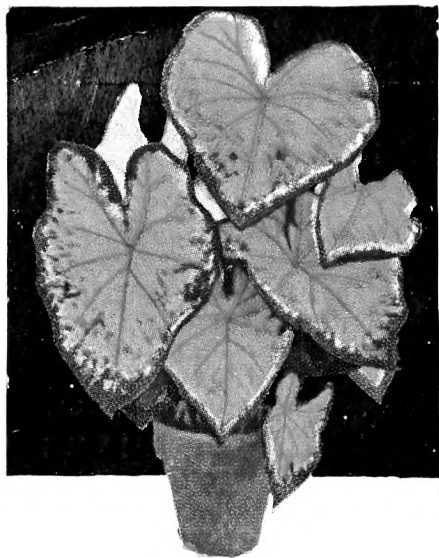

AUXILIN

Modern Liquid Root Grower for Cuttings

Auxilin is solution of Indolebutyric Acid, which, when applied to cuttings or "slips" in an easy-to-mix water solution, will ordinarily cause roots to form along the stem or at the base of cuttings within a very short time. Enough for 700 slips (1/6 oz.) together with the measuring graduate, 50c.

SUDBURY HOME GARDENER'S SOIL TEST KIT

This simple, practical, easy-to-use kit is your best insurance of gardening success. Tests for nitrogen, phosphorus, potash and acidity. It will make at least three separate tests for each element. The Sudbury Home Gardener's Soil Test Kit, complete with instructions and data on plant needs, \$2.00.
